

Black Box

Discuss your ProMotor import and/or export requirements with Drag+drop, before obtaining your Black Box ID number.

01 FEEDS

This is to set up imports/exports for *all* groups under your jurisdiction.

The screenshot shows the 'Setup' page for 'Feeds - Black Box'. At the top, there is a navigation bar with 'Home', 'Items', 'Lineage', 'Ads', 'Tools', 'Setup' (highlighted), and 'Logout'. Below this, there are three buttons: 'Open All', 'Close All', and 'Save'. The main content area displays a list of feeds: 'Cars Dot Com', 'MLS', 'MDR', 'Blackbox', and 'MActive Reverse Feed'. Each feed has a dropdown arrow. The 'Blackbox' feed is selected, and its configuration is shown in a form with the following fields: 'URL' (http://demo.promotor2.com), 'Import Interval' (0), and 'Export Interval' (0). There are 'Import Now' and 'Export Now' buttons next to the interval fields.

Navigate to Setup - Feeds - Black Box. Input your Black Box ID number into the URL Field. In the Import Interval Field, enter the intervals (hours) you want Black Box to check for new data to import into ProMotor via the Black Box.

In the Export Interval Field, enter the intervals (hours) you want Black Box to export new ProMotor data to your external location.

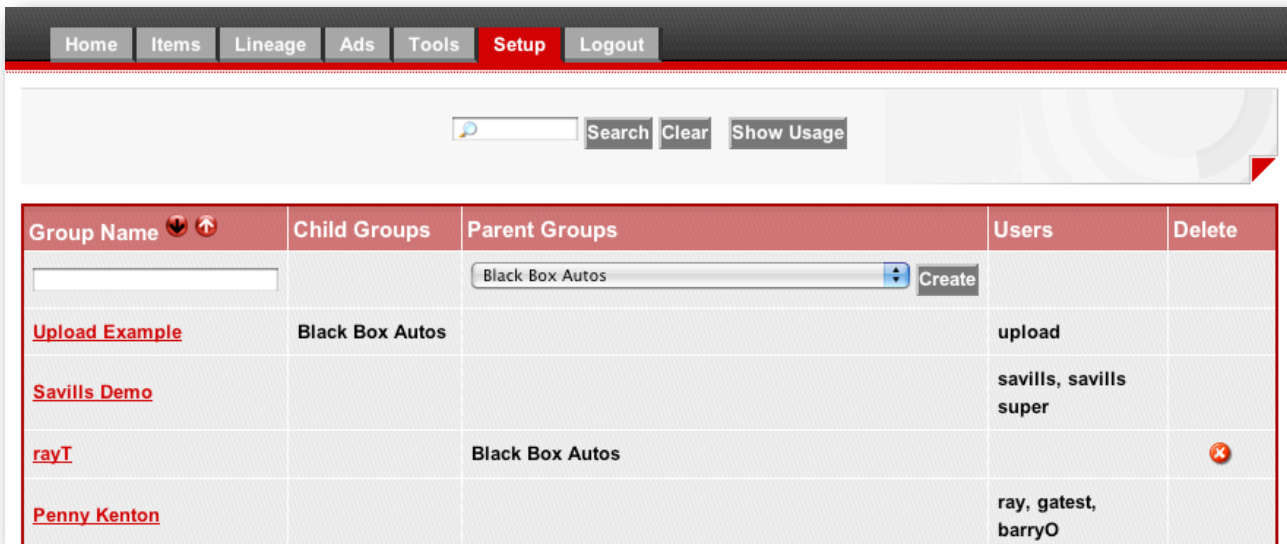

Note: if either interval is set to zero, it will default to one hour.

Click the Save button to save your changes.

02 GROUPS

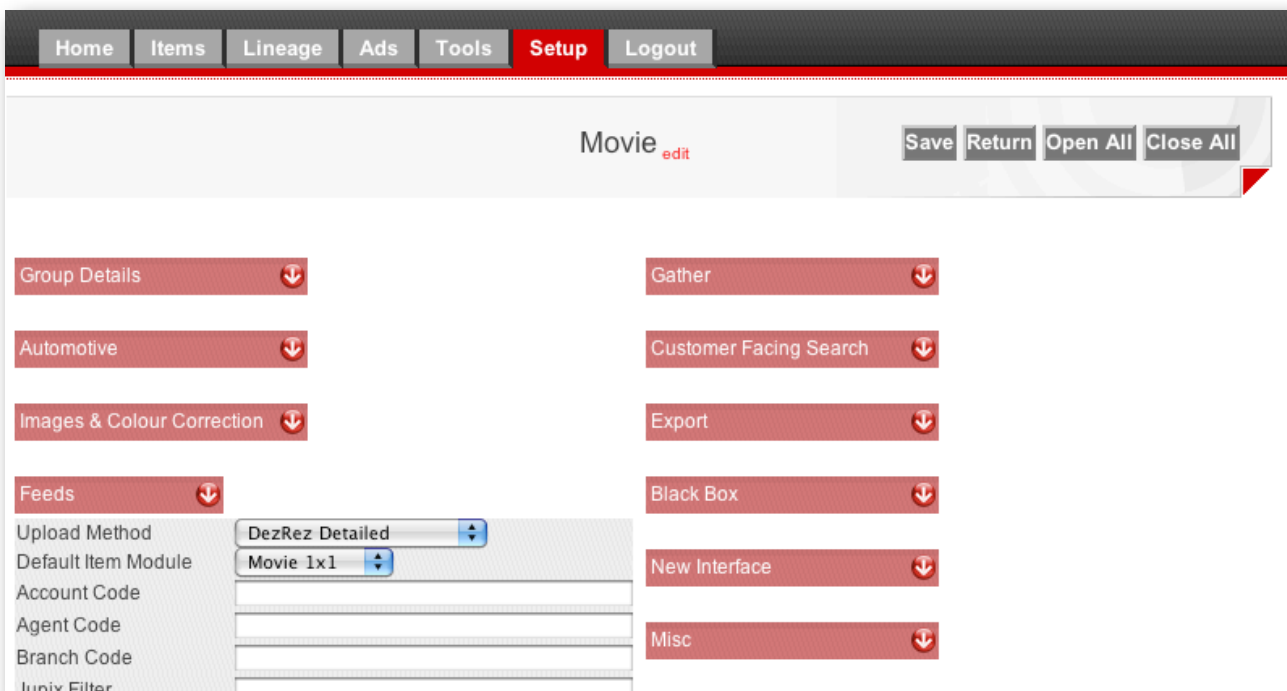

This is to set up imports/exports for *specific* groups under your jurisdiction.

Navigate to Setup - Groups. Click a Group Name in the Group Table to edit it, then open Feeds.

The screenshot shows the 'Setup - Groups' page. At the top, there is a navigation bar with tabs: Home, Items, Lineage, Ads, Tools, Setup (selected), and Logout. Below the navigation bar is a search area with a search box, 'Search', 'Clear', and 'Show Usage' buttons. The main content is a table with the following columns: Group Name, Child Groups, Parent Groups, Users, and Delete. The table contains four rows of data.

Group Name	Child Groups	Parent Groups	Users	Delete
<input type="text"/>		Black Box Autos <input type="button" value="Create"/>		
Upload Example	Black Box Autos		upload	
Savills Demo			savills, savills super	
rayT		Black Box Autos		<input type="button" value="X"/>
Penny Kenton			ray, gatest, barryO	

The screenshot shows the 'Movie edit' page. At the top, there is a navigation bar with tabs: Home, Items, Lineage, Ads, Tools, Setup (selected), and Logout. Below the navigation bar is a search area with a search box, 'Save', 'Return', 'Open All', and 'Close All' buttons. The main content is a form with various configuration options.

Misc

Note: most Fields are irrelevant due to the Black Box: an easier, quicker, more efficient method of transferring data.

Ensure the Item Template you need has been uploaded, then select it from the Default Item Module drop-down box.

Open Black Box, then enter your Black Box ID number into the Black Box ID Field. (Leave the Import into Lineage Table checkbox unchecked - this feature is under development.) From the Data Type drop-down, select either Properties or Vehicles. Check the Don't Update checkbox if you *don't* want the Black Box to automatically update ProMotor with data from your external source when this data changes.

The screenshot shows a software window titled "Black Box" with a red header bar containing a downward arrow icon. The window has a light gray background with a subtle grid pattern. On the left side, there are several labels: "Black Box ID", "Import Into Lineage Table", "Import Map", "Data Type", "Don't Update (Only creates)", "Don't Import", and "Don't Export". To the right of these labels are input fields and checkboxes. The "Black Box ID" field contains the number "0". The "Import Into Lineage Table" checkbox is unchecked. The "Import Map" field is a large empty rectangular box. The "Data Type" dropdown menu is open, showing "NO DATA" with a blue arrow pointing down. The "Don't Update (Only creates)", "Don't Import", and "Don't Export" checkboxes are all unchecked.

Check the Don't Import checkbox if you don't want the Black Box to import data into ProMotor from your external source. Check the Don't Export checkbox if you don't want the Black Box to export data from ProMotor to your external location.

Click the Save button to save your changes.
